

## Aesthetic Medicine North and Clinisept+ road trip

Last month the *Aesthetic Medicine* team hit the road along with Aesthetic Source on a tour of the Midlands, North and Scotland to promote our October event – Aesthetic Medicine North – and the launch of the ground-breaking new skin disinfection technology Clinisept+, which is being brought to market by Aesthetic Source in partnership with Clinical Health Technologies.

Over three days the team visited brands based in the North and Scotland who are exhibiting at the show, which takes place on October 22-23 at Manchester Central, as well as the clinics of speakers who will be presenting at the conference and business workshops. Go to the Aesthetic Medicine Live YouTube Channel to see videos interviews from the trip.

# Out and about

Out and about in the industry this month

## COOLSCULPTING SYMPOSIUM, CLARIDGES, LONDON

London's Claridges played host to the first UK CoolSculpting Symposium last month.

Hosted by leading beauty journalist Alice Hart-Davis, the event saw a panel of experts, including Dr Tracy Mountford and plastic surgeon Mr Patrick Mallucci, share their experience with the fat-freezing body shaping technology. New innovations, including the CoolAdvantage Petite applicator, were also unveiled (see page 92).

## JUVEA AESTHETICS SCULPSURE EVENT, HOME HOUSE, LONDON

Juvea Aesthetics held an exclusive launch to mark the introduction of the FDA-approved SculpSure treatment to its clinic. As well as a champagne drinks reception and canapes guests could enjoy express HydraFacials at private member's bar Home House in Mayfair.

The evening kicked off with an introduction by medical director Faz Zavahir, followed by a presentation from SculpSure. Live demonstrations and Q&A sessions were also a feature. Guests included Liz McClarnon, Gina Rio and Laura Vevere as well as beauty journalists and influencers.

## OFAA course, King's College, London

On Saturday September 9, the Oculo-Facial Aesthetic Academy (OFAA) ran a course on the Anatomical Basis of Prevention and Management of Hyaluronic Acid Dermal Filler Complications and Hyaluronidase Wet-Lab.

Founded by oculoplastic surgeon Mrs Sabrina Shah-Desai, who specialises in surgical and non-surgical periorbital rejuvenation, the course provided delegates with an understanding of facial anatomical layers using fresh cadavers and prosections. They were also able to practice anatomical surface marking on fresh frozen cadavers, with an emphasis on avoiding critical neurovascular anatomy in upper, mid and lower face as well as learning how to avoid complications from poor technique and inappropriate patient selection and the best ways to improve assessment and deliver safe outcomes.
