

Clinisept+

Cleans, Calms and Cares.

Tested by dentists, for dentists!

Clinisept Mouthwash is used and endorsed by some of the UK's leading dentists and orthodontists.

"Clinisept+ Mouthwash has infinite benefits over chlorhexidine containing mouthwashes - both during dental treatment and as part of regular hygiene around teeth and implants. It is safer to use, it doesn't stain teeth and leaves your mouth feeling fresh."

Dr Neil Millington
MSc BChD MGDS RCS (Eng)
Specialist in Prosthodontics

"I am very excited about the potential of Clinisept+ Mouthwash, which I expect to completely replace the use of Chlorhexidine containing mouthwashes in my practice."

Dr José Zurdo
LMS BMS MSc Cert.Perio (Gothenburg)
Specialist in Periodontics

Clinisept+

Mouthwash

Clinisept Mouthwash is an oral cleanser and hygienic rinse that delivers professional levels of antimicrobial protection against the harmful bacteria that cause gum disease and tooth decay, but without stinging or causing irritation.

The technology behind Clinisept+ Mouthwash represents a step change in oral hygiene: unlike traditional mouthwash chemistries, it provides an optimum combination of cleansing efficacy with complete oral compatibility – making it ideal for those with sensitive teeth or gums.

- + Contains no chlorhexidine, alcohol, colouring or flavouring
- + Non-irritant to teeth or gums
- + Causes no staining
- + Skin neutral pH
- + Non-cytotoxic and hypo-allergenic

Clinisept+ Mouthwash also provides an ideal environment for recovering teeth or gums following dental procedures.

Clinisept+

Cleans, Calms and Cares.

Clinisept+ Mouthwash: a gamechanger in oral hygiene

Revolutionary

Cleans, calms and soothes sensitive teeth, gums and mouths, without using harsh chemicals such as chlorhexidine.

Effective cleansing

Superior oral cleansing and deodorising from antimicrobial action that leaves the mouth feeling clean and healthy.

Gentle

Clinisept+ Mouthwash is gentle. It has a neutral pH and is non-cytotoxic. It cleans and deodorises without stinging or irritating.

How to Use Clinisept+ Mouthwash

Use Clinisept+ Mouthwash as instructed by your dentist or use once or twice daily for regular oral hygiene.

Rinse 15ml of Clinisept+ Mouthwash around mouth, teeth and gums thoroughly for 30 seconds and then spit out.

If using at night-time, use before brushing teeth so toothpaste fluoride is not rinsed away. Do not swallow and do not rinse with water.

Not recommended for and keep out of reach of children.

Cautions:

Always follow the instructions carefully. For single customer use only. Do not dilute, swallow or take from the bottle. Always use dosage cup. Use within 3 months of opening. Please discuss usage with your dentist or clinician if you have any queries.

Do not store in temperatures exceeding 28°C. Do not decant from this bottle.
