

## Tested by Dentists for Dentists!

**Clinisept+ Mouthwash is used and endorsed by many of the UK's leading dentists and orthodontists.**

**“Clinisept+ Mouthwash has infinite benefits over chlorhexidine containing mouthwashes - both during dental treatment and as part of regular hygiene around teeth and implants. It is safer to use, it doesn't stain teeth and leaves your mouth feeling fresh.”**

**Dr. Neil Millington**

MSc BChD MGDS RCS (Eng)  
Specialist in Prosthodontics

**“I have definitely seen a positive effect from using Clinisept+ Mouthwash and my patients have recorded quicker recovery times.”**

**Dr. Alfonso Rao**

Co-Founder Delta Dental Academy  
Owner Queen Square Dental Clinic

**Suitable for those with normal or sensitive teeth, and implants.**

# Clinisept+ Dental

**Clinisept+ Mouthwash is an oral cleanser and hygienic rinse that delivers professional levels of antimicrobial protection against the harmful bacteria that cause gum disease and tooth decay, but without stinging or causing irritation.**

The technology behind Clinisept+ Mouthwash represents a step change in oral hygiene: unlike traditional mouthwash chemistries, it provides an optimum combination of cleansing efficacy with complete oral compatibility – making it ideal for those with sensitive teeth or gums.

- Effective and gentle antimicrobial protection (EN1040:2005, EN1276:2019, EN14476:2013 +A1:2015)
- Contains no chlorhexidine, alcohol, colouring or flavouring
- Non-irritant to teeth or gums
- Causes no staining
- Neutral pH 7.0
- Non-cytotoxic and hypo-allergenic

**Clinisept+ Mouthwash also provides an ideal environment for recovering teeth or gums following dental procedures.**

## A Game Changer in Oral Hygiene

### Revolutionary

Cleans, calms and soothes sensitive teeth, gums and mouths, without using harsh chemicals such as chlorhexidine or hydrogen peroxide.

### Effective Cleansing

Superior oral cleansing and deodorising combined with highly effective antimicrobial protection leaves the mouth feeling clean and healthy.

### Gentle

Clinisept+ Mouthwash is effective but gentle: it has a neutral pH, is non-cytotoxic and doesn't cause stinging, burning or irritation.

## How to Use Clinisept+ Mouthwash

Use Clinisept+ Mouthwash as instructed by your dentist or use once or twice daily for regular oral hygiene.

Rinse 10-15 ml of Clinisept+ Mouthwash around mouth, teeth and gums thoroughly for 30 seconds and then spit out.

If using at night-time, use before brushing teeth so toothpaste fluoride is not rinsed away. Do not swallow and do not rinse with water.

Not recommended for and keep out of reach of children.

### Cautions

Always follow the instructions carefully. For single customer use only. Do not dilute, swallow or take from the bottle. Always use dosage cup.

Use within 3 months of opening. Please discuss usage with your dentist or clinician if you have any queries.

Do not store in temperatures exceeding 28°C. Do not decant from this bottle.
